

# ocac

## ECONOMIC ANALYST

### The Requirement

OCAC, in addition to its other responsibilities, also needs to meaningfully process the large volume of information available and compiled on a daily, weekly, monthly, quarterly and yearly basis. This information pertains to product availabilities, tanker movement, deficit imports needed, and can be used for improved forecasting and planning.

### The Position

Reporting to: The Secretary, OCAC

### Key Activities

- Develop statistical model for forecasting petroleum product needs
- Compile reports for the Secretary General based upon which correct short-term, medium-term and long-term decisions can be made related to product availability, constraints, and actions needed to address these
- Ensure that the OCAC is optimally informed to achieve its objectives efficiently and effectively

### The Person

Educational / Academic:

Economist; M.Sc (Economics) from a reputable Academic Institution

### Work Experience

Minimum 2 years as a Research Analyst in a reputable organization

### Skills

Good Communication, Desktop IT, Interpersonal, Numeric, Presentations, Report writing

Computer literate (Windows MS Office, Word, Excel, Power Point, Statistical Software)

### Age

35 Years Maximum

### Salary

Commensurate with Experience

OCAC is an Equal opportunity Employer, without any restriction related to gender, race, or religion
